BOOSTER SETS - FIX SPEED

- High hydraulic efficiency
- Sturdy and resistant
- Piping in stainless steel AISI 304
- Compact

DESCRIPTION

These are automatic pressure booster set for the pressurization of distribution networks with single phase and three-phase power supply.

The pumps are controlled by two differential pressure switches with adjustable settings, via an electrical panel with an analogue electronic board for:

- the sequential start-up of the pumps
- the inversion of the start-up order
- timer settable from 0 to 180», only for the three-phase version
- protection against dry running

When the network pressure reaches the value for the closing of the electrical contact of pressure switch n.1, a pump starts.

If the pressure continues to fall, when the closing value of the second pressure switch is reached, the second pump is started up.

When the value of the network pressure increases, the pressure switches open their contact causing the relative pump to stop.

At the end of each cycle, the automatic inverter changes the starting order of the pumps (once pressure switch n.1 is associated to pump n.1; in the next cycle to pump n.2).

If the two pressure switches close at the same time, the electronic board will delay the start-up of the second pump avoiding abrupt changes in pressure and the overload of the power supply.

MECHANICAL DATA

Operating pressure max.	16 bar	Temperature of the liquid max.	40 °C
Type of liquid	clean water without suspended solids or abrasive material		

ELECTRICAL DATA

Type of enclosure	IP 55	Ambient temperature max.	50 °C
-------------------	-------	--------------------------	-------

PRESSOMAT

BOOSTER SETS - FIX SPEED

SINGLE PHASE ELECTRICAL PANEL

Electrical panel

- Box in plastic material IP55
- Main circuit breaker
- Electronic control panel with manual - automatic buttons for each pump
- SML electronic board
- Pump start-up relay

Main functions

- Cyclic inversion of the start-up order of the pumps after each cycle end
- ON/OFF control of the level of the tank or the pressure of the supply duct by means of a float switch or a different differential pressure switch.

Signals and controls

- LED indicating the presence of power
- LED indicating the low water level in the tank or an insufficient pressure in the supply duct (aqueduct)
- LED indicating the operation of each pump

External control devices

- Two adjustable differential pressure switches ON/OFF
- ON/OFF float switch, located in the water collection tank, or
- Reverse pressure switch inserted in the water supply duct (aqueduct)

PRESSOMAT

BOOSTER SETS - FIX SPEED

THREE PHASE ELECTRICAL PANEL

Electrical panel

- Box in metal IP54
- Main switch
- Keyboard with electronic board SA
- Fuses, contactor and thermal relay for each pump
- Transformer with fuses for the auxiliary circuit
- M-O-T switch for each pump
- Star-delta starter for motors above 7.5 kW

Main functions

- Cyclic inversion of the start-up order of the pumps after each cycle end
- ON/OFF control of the level of the tank or the pressure of the supply duct by means of a float switch or a different differential pressure switch
- Timer of the pumps settable from 0 to 180 seconds, after the opening of the pressure switch operation contact

Signals and controls

- LED indicating the presence of power
- LED indicating the low water level in the tank or an insufficient pressure in the supply duct (aqueduct)
- LED indicating the operation of each pump
- LED indicating that one of the two thermal relays has tripped because of an overload
- LED indicating manual or automatic operation
- Buttons to select manual or automatic control
- Buttons to start or stop each pump (manual operation)

External control devices

- Two adjustable differential pressure switches ON/OFF
- ON/OFF float switch, located in the water collection tank, or
- 3 electrodes for the electronic control of the level of the tank, or
- Reverse pressure switch inserted in the water supply duct (aqueduct)
